## Schleswig-Holstein – the land of nurseries

On August 29th and 30th the Pinneberg region again becomes an international meeting place for nursery people from all over the world. With approximately 300 exhibitors and 6,000 – 8,000 expected visitors, the “Nurserymachinery 2019” will be the largest exhibition for nursery machinery in Europe.

Nurserymen from the region also have the chance to exhibit their products. This shows the quality and volume of the nursery production in the region, of 4,000 ha in hardy nursery stock and about 300 growers. At the same time it offers the opportunity to exchange experience and information with nurserymen and experts from in and outside the country.

As a technical reference book of about 300 pages, a large catalogue including full details of all exhibits is offered only available in German. In addition, the updated version of the online reference book is available.

For the first time Christmas tree growers and suppliers for Christmas trees get the chance to exhibit their machinery and plants as well.

## Baumschultechnik 2019 How to find us...

**Guide:** A23 (Motorway), exit (Abfahrt) 15 (Tornesch/Uetersen/Barmstedt), towards Barmstedt/Ellerhoop, turn right after approximately 500 m at the traffic light after Burger King and the Aral petrol station into the road “Oha, B5”. You will reach the main parking (Nord) area after 300 m on the left. If you follow the instructions on the map you can also reach the second parking place (Süd).
